## SUMMARY

Economist with a degree from Universidad Católica Andrés Bello and experience in applied research, macroeconomic analysis, and the evaluation of randomized controlled trials (RCTs). Experienced in leading projects to evaluate public policies, designing and implementing household surveys, and processing microdata. Also experienced in university-level teaching in international trade and econometrics, applying statistical and quantitative analysis tools (R, Python, Stata) to address complex socioeconomic issues.

## EXPERIENCE

### Anova Policy Research

Caracas, VE

*Research Economist*

January 2026 – Present

- Collected, processed, and forecast macroeconomic variables for Latin American and Caribbean countries, presenting results through an interactive dashboard using Power BI.
- Implemented and monitored a nationwide household panel survey, and estimated sampling weights and panel weights adjusted for attrition.
- Processed and analyzed household and labor force surveys from Latin American countries to construct poverty, multidimensional poverty, inequality, and labor market indicators.
- Monitored and processed data and conducted econometric analyses of RCTs evaluating discrimination against migrants in the credit market.
- Reviewed specialized literature to support research and project development.
- Wrote technical reports and presented findings using Microsoft Office tools.

### Universidad Católica Andrés Bello

February 2023 – Present

*Teaching Experience*

Caracas, VE

- **Professor (unranked) – Theory and Policy of International Trade** (September 2026 – Present): Delivered lectures and assessments.
- **Teaching Assistant – Econometrics I** (September 2024 – February 2025): Led supplemental classes, designed teaching materials, and coordinated assessments.
- **Undergraduate Teaching Assistant – Econometrics I** (February 2023 – May 2024): Planned theoretical and practical classes on simple and multiple linear regression models, interpretation and assumptions of estimators, and an introduction to time series.
- **Undergraduate Teaching Assistant – Theory and Policy of International Trade** (September 2023 – March 2024): Conducted theoretical and practical classes on international trade theory, including the Ricardian, Heckscher-Ohlin, and specific-factors models. Reviewed tariff theory, economies of scale, and growth.

### Ecoanalítica

February 2024 – April 2024

*Research Assistant – Research Team*
